

ELITECH USB TEMPERATURE DATA LOGGER RC-5

Description:

- RC-5 data logger is mainly used for temperature recording during storage and ocean/air/highway transportation of foodstuff, medicine, chemicals and other products, especially widely used in all kinds of warehousing, logistics and cold chain, such as refrigerated containers, refrigerated trucks refrigerated package, cold storage, laboratory, etc. or in large-sized global supply chain businesses.

- This mini Temperature Data Logger has wide measuring range $-30\text{ }^{\circ}\text{C}\sim+70\text{ }^{\circ}\text{C}$, high accuracy, adjustable record intervals & long battery life for convenient and reliable temperature data recording, monitoring and analysis.

- It has a large permanent data memory of 32000 points and comes with data management software for easy data download to computers through USB interface. With the software, you could analyze data in form of tables and graphs and export in picture format. The data could be queried, saved, printed and exported in Word/Excel/TXT /PDF format.

Package:

- 1 x Data Logger
- 1 x CR2032 battery (Installed inside)

Product Overview:

Elitech RC-5 USB temperature data features a plug-and-play USB port interface. It allows for faster access to data collected in any cold chain management process. This could be in pharmaceuticals, food, life science, cooler boxes, medical cabinets, fresh food cabinets, freezer or laboratories.

To achieve faster data analysis on any Elitech USB data logger, you can export data in PDF/Excel via data management software. Alternatively, you can use the multi-function LCD.

For convenience and reliability, Elitech USB temperature data logger features a replaceable battery, optional mounting bracket, double button operation and double bracket.

Its robust and compact design satisfies the dynamic demands in any sensitive storage and transportation system. It records real time temperature that is stored in non-volatile memory for access via the USB port. It has 0.1°C resolution and $\pm 0.5^\circ\text{C}$ accuracy.

32000 points Record Capacity

Features:

1. Wide measuring range, high accuracy and large permanent data memory.
2. Data management software included for working with PC easily
3. Data can be downloaded, analyzed, exported and printed conveniently
4. Over Temperature Alarm & Upper/Lower Limits can be set
5. MAX/MIN values available
6. Large permanent data memory of 32000 points
7. Data could be queried, saved, printed and exported in Word/Excel/TXT /PDF format.

Specifications:

- 1) Temperature measuring range: $-30\text{ }^{\circ}\text{C}\sim+70\text{ }^{\circ}\text{C}$; Resolution: $0.1\text{ }^{\circ}\text{C}$
- 2) Accuracy: $\pm 0.5\text{ }^{\circ}\text{C}$ ($-20\text{ }^{\circ}\text{C}\sim+40\text{ }^{\circ}\text{C}$); others, $+1\text{ }^{\circ}\text{C}$
- 3) Temperature unit: $^{\circ}\text{C}$ or $^{\circ}\text{F}$ optional
- 4) Record capacity: 32000 points (MAX)
- 5) Record interval: 10s~24hour adjustable
- 6) Sensor: Internal NTC thermal resistor
- 7) Communication interface: USB interface
- 8) Power supply: CR2032 battery
- 9) Battery life: In normal temperature, if the record interval sets as 15 minutes, it could be used above one year.
- 10) Item Size: approx. 80 (L) x 34 (W) x 14 (H) mm
- 11) Item Weight: approx. 30 g
